8/5 - Fall Data Review for Students with Significant Disabilities

8/12 - Developing a Virtual Learning Plan

8/27 - A Guide to the Content Connectors*

Each session is designed to help participants achieve clear objectives for improving educational opportunities for students with significant disabilities.

Fall Data Review for Students with Significant Disabilities

- Identify best practices for collecting student data for Students with Significant Intellectual Disabilities post school closures and continuous learning.
- Determine the use of student data prior and during continuous learning and the impact on instructional decisions.
- Review tools and resources to collect student data and determine instructional next steps both within virtual and in-person instruction.

Developing a Virtual Learning Plan

- Identify individualized educator virtual learning needs, such as developing scheduling, collaboration with colleagues and parents, and Universally Designed Instruction.
- Review tools, resources and process to develop a virtual learning plan.

A Guide to the Content Connectors*

- Identify tools and resources to support instruction of the Content Connectors.

*

*This content is specific to educators in the State of Indiana who use the alternate standards known as Content Connectors.
